DICAOQING

YIXING ZISHA CLAY

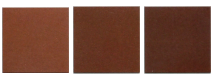

Dicaoqing lies at the deepest geological tier of the historic Huanglongshan purple clay veins in Yixing. Formed under immense tectonic compression, it possesses the highest mineral density and oiliness among all Zini clays—rightfully revered as the “Crown Jewel of Purple Clay.”

DICAOQING · COLOUR & TEXTURE

Shaft No. 4 Dicaoqing

1190℃ 1210℃ 1230℃

Benchmark Shaft No. 4 Ore
Fires from warm terracotta at 1190°C to deep noble aubergine at 1230°C. Displays a silken “pear-skin” tactile grain that rapidly develops a luminous, oil-rich tea patina with daily use.

Tender Ore

1180℃ 1200℃ 1230℃

Golden Inclusions (Ji Yan)
Naturally rich in native green clay “chicken-eye” nodes. Kiln heat blooms them into golden micro-flecks across dark purple—the definitive visual seal of genuine raw ore.

Deep Rock Ore

1190℃ 1210℃ 1230℃

Iron-Bone Resonance
Dense stone ore rich in crystalline quartz. Low plasticity requires master-level handcrafting. Yields a resonant chime and superior breathability that elevates vintage and roasted teas.

Before first use, rinse thoroughly with boiling water to clear residual dust. Outstanding versatility: recommended for Raw & Ripe Pu-erh, Wuyi Rock Tea, Oolong, Aged White Tea, and Black Tea.
