HUANGJIN DUAN

YIXING ZISHA CLAY

Huangjin Duan, or Golden Duanni, is admired for its warm golden colour and softly grained surface. Within the varied Duanni family, pale raw mineral becomes a rich ceramic palette through kiln firing. Golden grounds scattered with darker grains give each vessel a quiet depth: warm as aged silk, textured like fine sand, and beautifully suited to the clean lines of classical Yixing forms.

HUANGJIN DUAN · COLOUR & TEXTURE

Golden Duanni

Colour examples

Golden Colour · Subtle Grain
Published Golden Duanni samples show changing fired tones and a clearly visible granular texture. Warm ochre and reddish-brown grains bring depth to the clay surface.

Shaft No. 4 Duanni

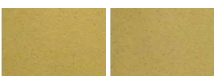

1170°C 1190°C

Quiet Gold · Fine Texture
Shaft No. 4 Duanni offers a subdued yellow palette. These published 60-mesh samples compare the surface at 1170°C and 1190°C.

Taixi Duanni

1210°C 1230°C

Bright Yellow · Mineral Flecks
Taixi Duanni is shown here at 1210°C, 40 mesh, in a weak reducing atmosphere; and at 1230°C, 60 mesh. The conditions differ, as do the samples.

Duanni ore comparison. Published samples; separate mineral varieties.

Ideal Teas: Supreme for **White Tea (Silver Needle / White Peony), High-Mountain Floral Oolong, Green Tea, Young Raw Pu-erh, and Lightly Roasted Teas**.
Daily Care: Empty the leaves after brewing, rinse with clean water and leave the lid off to dry. A dedicated tea helps keep the flavour consistent.
